

*Answer Key*

**Synonyms**

1. Grandchildren
2. Echoes
3. Halves
4. Geese
5. Mysteries
6. Oxen
7. Sketches
8. Mice
9. Sheep
10. Feet

**What's in Store for the Future**

11. wheel
12. dishpan
13. shock
14. pathway

**Washington Weed Whackers**

15. price
16. gems
17. cents
18. city
19. gentle
20. pages
21. place
22. age
23. giant
24. gyms
25. cell
26. message
27. changes

**RFC-C-37**

28. D
29. A
30. C
31. D
32. D
33. B

**RFC-C-08**

34. B
35. D
36. B
37. B

38. A

39. D

**RFC-C-40**

40. C

41. B

42. C

43. C

44. C

45. The airborne spectacle begins with the fish accelerating its swimming speed, culminating in a powerful push from its tail. This burst of energy propels the fish out of the water, and as it breaks through the surface, the side fins unfurl, resembling the wings of an airplane.

46. Unlike the undulating motion of typical fish fins, the side fins of a flying fish remain steadfast, resembling fixed wings in flight.

47. The remarkable display serves as an evasive maneuver to escape predators lurking beneath the waves. By taking to the air, the flying fish effectively eludes the pursuit of fish attempting to chase them.

48. Flying fish can reach heights of almost 300 feet above the water during their aerial display.

49. The adaptation of flying fish to take to the air is an artful dance between the elements of sea and sky for survival. This behavior allows them to evade predators beneath the waves by utilizing the airspace above, showcasing the wonders of adaptation in the natural world and emphasizing the intricate balance between sea and sky for the survival of species.
