- 35. B
- 36. Critics believe that aesthetic experiences are so profound that they cannot be

adequately expressed or analyzed through reason.

- 37. Poets criticize aesthetics for being too unfeeling, while art critics find it too general and ill-informed.
- The passage suggests that the world in "1984" is devoid of aesthetic pleasures derived from art.
- 39. Some artists fear that studying aesthetics may obstruct their creative instincts with obscure ideas, hence comparing it to a lobotomy.
- 40. The passage highlights various criticisms of aesthetics from different perspectives, such as poets, art critics, psychologists, and more. It connects these criticisms to the ongoing concern initiated by Socrates and Plato, emphasizing the enduring and multifaceted nature of the discourse around aesthetics.

- 41. B
- 42. A
- 43. C
- 44. C
- 45. D
- 46. The conflicts included the civil war in Russia, the Greece-Turkey conflict, Jewish-Arab tensions in the Middle East, and Indian aspirations for self-rule under British rule.
- 47. The Paris Peace Conference set the peace terms for the defeated nations and established the League of Nations, but its outcomes fell short of achieving lasting peace.
- 48. The epidemic led to a significant reduction in populations, adding to the complexities and difficulties faced by nations in the post-war era.
- 49. American isolationism hindered the League of Nations' goals of achieving

world disarmament and preventing invasions, as the U.S. was reluctant to engage in international political situations.

50. The aftermath of World War I illustrates that the end of a war does not guarantee lasting peace, and addressing geopolitical, cultural, and ideological conflicts requires sustained efforts and cooperation among nations.

- 31. B
- 32. C
- 33. D
- 34. B
- 35. The aldermen and councilors were in control of various aspects of local government, including municipal

transport, public parks, tax collection, and more. Their influence and corruption contributed to their prosperity.

- 36. Teachers had to buy insurance because it was a requirement to get anywhere in the town. The passage suggests that insurance was a pervasive and necessary aspect of life.
- 37. The passage characterizes the political activities as imaginative and vituperative, involving extended discussions on political theory. It also highlights the deceptive nature of politics for some men.
- 38. The mention implies that the town had a lively and active atmosphere, with people openly expressing their views and engaging in discussions.
- 39. The passage portrays a connection between the political activities of the men, the corruption of the aldermen and councilors, and the resultant power dynamics in the town. It suggests that political influence and prosperity were intertwined, with corruption playing a significant role in shaping the town's social and economic structure.

- 40. B
- 41. C
- 42. C
- 43. A
- 44. D
- 45. Mrs. Miller was an older woman with well-cut white hair, carefully made up but not overly, wearing a stylish suit and small earrings.
- 46. The narrator felt a sinking heart, imagining the potential challenges and worries Mrs. Miller might face being separated from her son and grandson.

- 47. The passage suggests that Mrs. Miller's confusion might be related to the effects of aging, a common phenomenon among older people.
- 48. The cabin attendant consulted the flight officers and then informed Mrs. Miller that she needed to deplane, with the expectation that airport personnel would assist her in finding her son.
- 49. Airlines could consider implementing additional support services, such as dedicated personnel for elderly passengers, clearer communication procedures, and enhanced assistance for those who may experience confusion or memory challenges.

- 37. Sols are solid colloids in a liquid or a gas in a liquid; gels are oblong-shaped colloids forming a branched structure in a liquid; emulsions are minute droplets of a liquid dispersed in a second liquid.
- Brownian motion, the random motion of colloidal particles, occurs due to collisions with other molecules. It contributes to the zigzag motion of colloids.
- 39. The Tyndall effect refers to the scattering of light by colloidal particles. Colloids provide a path for a sharp beam of light and may reflect normal light as a color.
- 40. Colloids disperse themselves in a solvent or gaseous medium by having the same electrical charge, causing them to repel each other (known as Brownian motion).
- 41. Colloids are stable when carrying the same electrical charge because the like charges cause them to repel each other, preventing aggregation and allowing them to disperse themselves in a solvent or gaseous medium.

- 43. B
- 44. D
- 45. A
- 46. C
- 47. Tinne's explorations provided valuable information about the region's geography, flora, and fauna, contributing to scientific knowledge.
- 48. Tinne and her group faced challenges such as illness, with one scientist dying, and the death of Tinne's mother.
- 49. Tinne developed a fascination with the desert and its people during her travels in Algeria and Tunisia.
- 50. According to the passage, it was reported that the inhabitants believed Tinne's iron

water tanks were filled with gold, possibly motivating the murder.

51. Alexandrine Tinne's explorations contributed to scientific knowledge, but her tragic end underscores the challenges and risks faced by early explorers, especially in unfamiliar and sometimes hostile environments.

- 40. Exposure to these elements can cause oxidation, fading, and other forms of damage to the surface, leading to the aging of the car's shine.
- 41. Polish should be avoided on vinyl surfaces as it may affect their appearance. Vinyl surfaces can be negatively impacted, so care must be taken during the polishing process.
- 42. Washing the car removes dirt and prevents scratching during the polishing process. Applying polish to a dirty surface may lead to scratches on the car's paint.
- 43. Exposure to factors like light, water, and air pollution can lead to oxidation, fading, and other damages, diminishing the longevity of the showroom shine.
- 44. Neglecting to use auto polish may result in the continued deterioration of the car's shine due to exposure to environmental factors. This can lead to a loss of the attractive showroom luster and potentially reduce the overall aesthetic appeal of the car.

- 47. C
- 48. B
- 49. D
- 50. The invention of the printing press made books more accessible by allowing largescale production, reducing costs, and increasing availability.
- 51. Movable type allowed for the arrangement and reuse of individual letters in printing, revolutionizing the production of written material.

- 52. Books were copied by hand on expensive parchment, a time-consuming process often done by monks, making books scarce and costly.
- 53. The introduction of paper made books cheaper compared to parchment, although they were still scarce.
- 54. The printing press revolutionized communication by making printed material more widely available, affordable, and accessible, leading to a significant increase in literacy and knowledge dissemination.

- 33. B
- 34. C
- 35. D
- 36. The Red Scare heightened the fear of communist influence and espionage,

making Americans aware of the possible presence of infiltrators. This fear manifested in movies depicting invasion scenarios.

- 37. The aftermath of the atomic bomb and concerns about radiation effects influenced the themes of these movies, reflecting anxieties about the consequences of nuclear technology.
- 38. Orson Welles's radio broadcast created widespread anxiety as thousands of citizens believed Martians were landing in New Jersey, illustrating the power of media to influence public perception.
- 39. Writers with vivid imaginations like Asimov and Heinlein offered thrilling possibilities and contributed to the creation of imaginative scenarios involving aliens and the unknown.
- 40. The passage suggests that the mysterious nature of space, coupled with the unknown possibilities, fueled the imagination of writers and readers. This fascination contributed to the creation of science fiction scenarios involving aliens, as seen in the popular culture of the 1950s.

- 44. C
- 45. C
- 46. Enlightenment thinkers applied Newtonian methods to psychology, education, government, religion, law codes, treatment of criminals, the slave trade, and economic life.
- 47. The Enlightenment's optimistic outlook was based on the belief that individuals,

using reason, could discover natural laws and progress toward a better life.

- 48. Some thinkers acknowledged that there were limits to human reasoning powers and that emotion, or feelings, also played a significant role in human behavior.
- 49. One example is the crusade for the elimination of slavery.
- 50. The emphasis on reason during the Enlightenment could have influenced movements for human rights, democracy, and social justice in the following centuries, as people sought rational solutions to societal problems.

- 35. C
- 36. "Second sons" were those who, due to

British law, did not inherit the bulk of the estate. Seeking livelihood elsewhere, some

entered the ministry, while others, like Sir Walter Raleigh, came to Virginia to raise tobacco.

- 37. Despite the area's arability, clearing the land required time and manpower. Many planters staked claims to large acres but did not plan to do manual labor themselves. Various workforces, including convicts, indentured servants, and African natives, were eventually brought in.
- 38. Settlers in the North sought freedom to practice religion and formed small communities based on shared beliefs, aspiring to create a theocracy. In contrast, settlers in the South, like planters, were motivated by economic pursuits such as raising tobacco.
- 39. Settlers in the New England area sought religious freedom, shared beliefs, and worked together to create communities. They established a theocracy, and their settlements thrived due to collaboration and a sense of community.
- 40. The passage suggests that the foundational differences, rooted in economic pursuits and religious freedom, laid the groundwork for cultural, economic, and social distinctions between the North and the South. These distinctions eventually played a role in the American Civil War, also known as the War Between the States, nearly 200 years later.

- 36. King applied for a permit, which was denied. He scheduled an illegal march, leading to arrests by the police.

- 37. The clergymen opposed marches and demonstrations as a means of working toward a solution to racial problems.
- 38. King responded to each point raised by the clergymen, analyzing when it is proper to act in violation of an unjust law, asserting the right and moral duty to oppose it peacefully.
- 39. King believed that if a law is unjust or unfair, individuals have not only a right but also a positive moral duty to oppose it, as long as their opposition remains peaceful and non-violent.
- 40. The events in Birmingham, including the denial of the permit, the illegal march, and King's response, showcased the struggles faced by African Americans in their fight for civil rights. It brought attention to the moral duty to oppose unjust laws, contributing to the larger narrative of the Civil Rights Movement.

- 43. D
- 44. B
- 45. C
- 46. The canyon is inhabited by strange marine life, including colonies of clams, tube worms, and bacteria feeding on chemicalrich fluids from underwater springs.
- 47. Turbidity currents, powerful underwater debris flows, were discovered to be a mechanism capable of carving undersea canyons over time.
- 48. The port of Moss Landing is mentioned because it is located within yards of the head of Monterey Canyon, making it easily accessible for researchers.
- 49. While the geologic history of Monterey Canyon is generally understood, the details of how it was carved out of the

continental shelf remain incompletely known, posing a challenge for researchers.

50. The study of Monterey Canyon can provide insights into unique marine ecosystems, the impact of turbidity currents on geological formations, and the interplay between land and underwater features, enhancing our understanding of Earth's processes.

- 33. D
- 34. C
- 35. C
- 36. Dense foliage indicates a healthy plant as it suggests normal and balanced growth. It

contributes to the overall well-being of the plant.

- 37. Insects secreting honeydew may attract mold and other issues, negatively affecting the health of the plant. The shiny sticky substance can be a clue to the presence of pests.
- 38. Leaves being far apart may suggest rapid and abnormal growth, potentially due to factors like excessive fertilizer or other conditions that push the plant to grow unnaturally.
- 39. Roots growing through the drainage hole indicate that the plant has outgrown its pot, which can lead to issues like restricted growth and compromised health.
- 40. Look for a plant with dense foliage, examine the leaves for discoloration, check for signs of insect infestation, and ensure that roots are not growing through the drainage hole. These factors collectively indicate the health of the plant.

- 43. C
- 44. C
- 45. C
- 46. The atmosphere is tense, with the twins whispering hopefully about James, and Steiner feeling remorse and dazed by the unusual behavior of James.
- 47. Steiner experiences a sense of loss and grief for his son as he looks at his aging house, realizing he hadn't seen it in two weeks.
- 48. Steiner was looking for a shatterproof, full-length mirror, and an exercise mat recommended by the physical therapist.

- 49. James's silence becomes a focal point of concern and hope for the family during the drive home, especially for the twins.
- 50. Steiner's internal conflict, involving remorse, grief, and a desire for more children, contributes to a poignant and emotional tone, adding depth to the narrative as it explores themes of family and loss.

- 32. B
- 33. C
- 34. C
- 35. C
- 36. Zeus, the ruler of the gods, did not want to offend Hades or Persephone. He did not agree to the marriage but did not

forbid it, leading to the events that unfolded.

- 37. Persephone could return to her mother if she had not eaten anything in the underworld. As she had eaten pomegranate seeds, she must spend part of the year in the underworld, leading to the seasons.
- 38. Demeter's anger and sadness at Persephone's abduction led her to cause all plants to stop growing, putting people in danger of starvation.
- 39. Persephone's time in the underworld corresponds to winter when Demeter is sad, and plants do not grow. Her return marks the arrival of spring, and plants begin to grow again.
- 40. The myth reflects an attempt to explain the cyclical changes in seasons through storytelling and the attribution of natural events to the actions and emotions of mythical figures, providing a cultural narrative for natural phenomena.

- 41. C
- 42. A
- 43. C
- 44. C
- 45. C
- 46. Carthage became a center of industry, learning, and luxury, arguably the second greatest city of the Roman Empire.
- 47. No pages or lines of the great libraries of books in the Punic language remain.
- 48. The Greeks and Romans, who made war on Carthage, presented a biased picture, making it necessary to question the objectivity of historical accounts.
- 49. After the first war, Carthage became powerful; after the second, it became rich; and after the third, it vanished.

50. The passage emphasizes challenges such as biased historical accounts, the loss of the Punic language, and the reliance on external sources for information on Carthage, making it difficult to present an unbiased and complete history.

- 32. A
- 33. D
- 34. C
- 35. B
- 36. The Doppler effect, which causes a change in frequency based on the observer's motion, was observed in the

microwave frequency radiation bathing the Earth, supporting the theory.

- 37. The compressed matter from the Big Bang turned into a fireball. As it flew away and motion set in, bits of it glued together to form galaxies, stars, and planets.
- 38. The precise microwave frequency observed supported the idea that the universe began with a Big Bang, providing evidence for the theory.
- 39. Some scientists theorize that gravity will eventually cause the universe to collapse back onto itself, leading to a "big crunch" in the far distant future.
- 40. The potential for the universe to either continue expanding indefinitely or collapse in a "big crunch" suggests a dynamic and ever-changing cosmic process, highlighting the complexity and uncertainties in the continuity of existence.

- 41. C
- 42. C
- 43. D
- 44. A
- 45. C
- 46. Costa Rica boasts diverse wildlife, including various bird species, mammals, and plants, contributing to its natural beauty and making it a prime destination for nature enthusiasts.
- 47. The Monteverde forest is called a tropical cloud forest because it derives moisture not only from rain but also from the misty touch of clouds, creating a unique and rich ecosystem.
- 48. Sunlight is crucial for the forest's order; large trees block sunlight from reaching the forest floor, leading ground-level plants to grow large leaves to collect available light.

- 49. The author perceives the forest as an organism itself, growing at a fantastic pace. The analogy used is that of vines weaving into the complex fabric of the forest.
- 50. The presence of diverse species likely contributes to a balanced and resilient ecosystem within the national parks and nature reserves, fostering ecological stability and enhancing the overall health of the environment.
